

Sports Premium 2015-16

Total funding received: £9,420

Expenditure	Activity	Purpose/Impact
£2028.85	General PE equipment purchase order	Renewal of PE stock equipment to support teachers and coaches to deliver the updated school PE curriculum
£1,743	Gymnastics teacher upskill	After identifying a lack of confidence in gymnastics teaching, the school hired an outside specialist to provide focused gymnastics support to class teachers. The specialist is working with each teacher over a sequence of six lessons to model good gymnastics teaching and support teachers to plan their own sessions, including sessions that utilise the new gymnastics equipment available in school. Teachers who have received support so far report increased confidence and enthusiasm for gymnastics.
£3,096	Sailing @ All Aboard Watersports Bristol	In order to promote interest in new sports and physical activities, Year 5 children received 6 weeks of sailing lessons in September 2015. Sailing was chosen as a sport that would otherwise be inaccessible to children from the many deprived backgrounds that Hannah More serves. Feedback from children indicates a greater confidence on the water and interest in pursuing future lessons.
£850	Family swimming sessions	Following the popularity of family swimming sessions run last year, the school booked further sessions at Easton Leisure Centre. The sessions encourage family swimming, activity and fitness, and form part of the school's new drive toward improving the fitness of the wider school community.
£150	Sports Day track hire	To build excitement over our annual sports day and provide KS2 children with an experience of using professional sport facilities, we hired the Whitehall Athletics Running Track for the races portion of our Sports Day.
£1214.80	'Fit School' resources	To support the implementation of the school's new healthy lifestyles 'Fit School' agenda, resources (such as token collectors acting as a 'fit currency' and pedometers etc...) were purchased. To date the Fit School initiative has enjoyed a keen uptake and reception among the school community, with children speaking more confidently about healthy lifestyles and a greater awareness of how to make healthy choices.
Total spending: £9,082.65 (excess reserved for resources as needed)
