Amber:

Every number in the 2 times table is even.

You may want to use this table to show your working out:

Even Numbers	Odd Numbers
0 2 4 6 8 10 40 12 34 56 78 For example..	1 3 5 7 9 21 13 55 67 89 For example

Do you agree? Explain your reasoning.

I agree because all even numbers can be shared

Between 2 people and so must end in 0,2,4,6 or 8 ones.
